

CORE COACHING SKILLS MODULE

Core Coaching Skills Module is designed to further support your development as a coach. Similar to Basic Coach Training, Core Skills Coach Training will introduce you to several key building blocks of great coaching, further unpack the 11 Core Coaching Competencies, plus provide a framework for establishing a strong personal foundation. You will also see coaching in action as you observe LIVE coaching.

While there are many similarities with your initial coach training, there are also several key differences. The goal of this training is to further develop and hone your coaching confidence and competence. One of the ways we can attain this goal is to provide you with additional coaching material and resources. Another way to achieve this goal is to increase your level of participation and interaction during the training event. In practical terms, that means:

- We will be tapping into your coaching experiences. Come prepared to share your experiences as the coach.
- We are requesting that you complete the coaching scenarios in this handbook and be prepared to discuss your responses with others during the training event.
- You will be doing most of the LIVE coaching. Each participant will have an opportunity to coach and be coached.
- The learning environment will be more like a group coaching experience than a traditional teacher/trainer/expert environment.

Certificate of Completion will be offered upon completion of the entire Core Coaching Skills training program; which, in addition to this one day class includes, a Practice Lab and Strong Personal Foundation Class + two electives, along with the mentor-coaching requirements.

Cost: \$150/person

Date: Friday, January 22, 2010 • 9:00am - 4:00pm
